

About

Panaya is the leader in continuous delivery of innovation to the world of Enterprise IT Applications. With Panaya, IT and Business leaders can accelerate and promote change so that enterprise applications meet the rising pace of today's business.

We empower organizations to continually deliver innovation through change across enterprise applications, bringing the promise of Agile to the world of Enterprise IT.

Panaya provides a cloud based enterprise agility platform that includes test management, test automation and application lifecycle management solutions that ensure collaboration between Business and IT, enabling faster release velocity while ensuring quality.

Enabling the Agile Enterprise

- › **Enterprise Agility Platform** - Panaya provides a unique process-centric approach to application life cycle management with **Panaya Release Dynamix (RDx)**, a cloud-based enterprise agility platform. From initial business change request through to testing and production, Panaya delivers the value of agile, continuous delivery to the world of Enterprise Applications.
- › **End-to-End Testing - Panaya Test Center** enables a process centric approach to test management delivering real-time visibility into the status of requirements as they're being delivered. Powered by Machine Learning technologies Panaya Autonomous Testing provide automation and acceleration of regression testing and user acceptance testing.
- › **Delivery Impact and Risk mitigation** - Panaya utilizes real-time code analysis of your SAP, Oracle and SFDC applications and provides actionable insights into all other impacted transactions to ensure those impacted areas have test coverage and to predict the full impact of change, before changes are made.

Customers

Panaya customer base spans over 1600 enterprises worldwide, including over 220 of the Fortune 500 companies. There are more than 300 Panaya Test Center customers and over 50 ALM replacements across various markets including Utilities, Oil & Gas, Automotive, Manufacturing, Pharmaceuticals, Infrastructure and Services.
