

## Panaya Test Dynamix

**Accelerate** and **standardize** packaged application testing

With Panaya Test Dynamix, **accelerate** and **standardize** packaged application testing to drive more innovation while reducing testing efforts by 30-50%, without compromising on scope or quality.

### Accelerate testing processes for all stakeholders

- › **Managers**  
Real-time alerts for testing and defects, preventing bottlenecks
- › **Business users**  
Automated documentation of test evidence and defects
- › **Functional analysts**  
Automation of repetitive testing activities
- › **Professional testers**  
Seamlessly improves business knowledge capture
- › **Defect manager**  
Easier defect reproduction while reducing back and forth with testers

### Standardize testing processes for overall increased software quality:

- › Technical IT and business users adopt the same testing methodology
- › Test managers gain real-time visibility over all test cycles, including large scale UAT.

#### **Built-in Collaboration Tools**

Streamline testing cycles with proactive notifications and communication. Eliminate idle times, relieve workload bottlenecks and ensure optimal workflows.

#### **SaaS**

No software or hardware installation, seamless integration, frequent and painless upgrades as well as monitoring of on-premise automation tools.

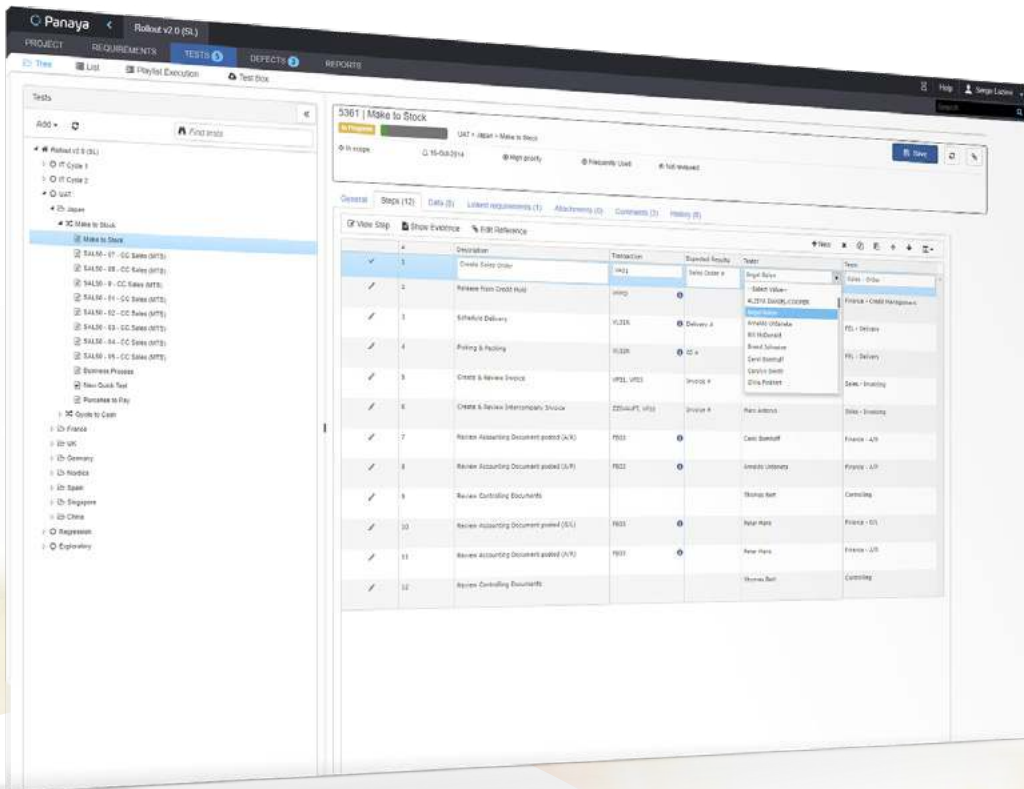

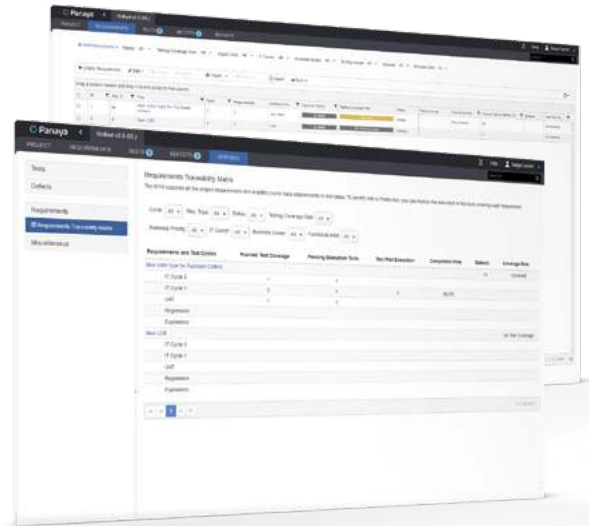

#### **Automation Integrations**

Complete integration of Panaya Test Dynamix with test automation tools such as Tricentis Tosca, HP-UFT, Worksoft and more.

# Key Features

## Requirements Traceability

Define requirements and related test plans for requested application change. Monitor their progress, ensuring full traceability of all changes.

## Intuitive Test Planning

Tests reflect end-to-end business process sequence, making planning and onboarding fast and intuitive for application testing.

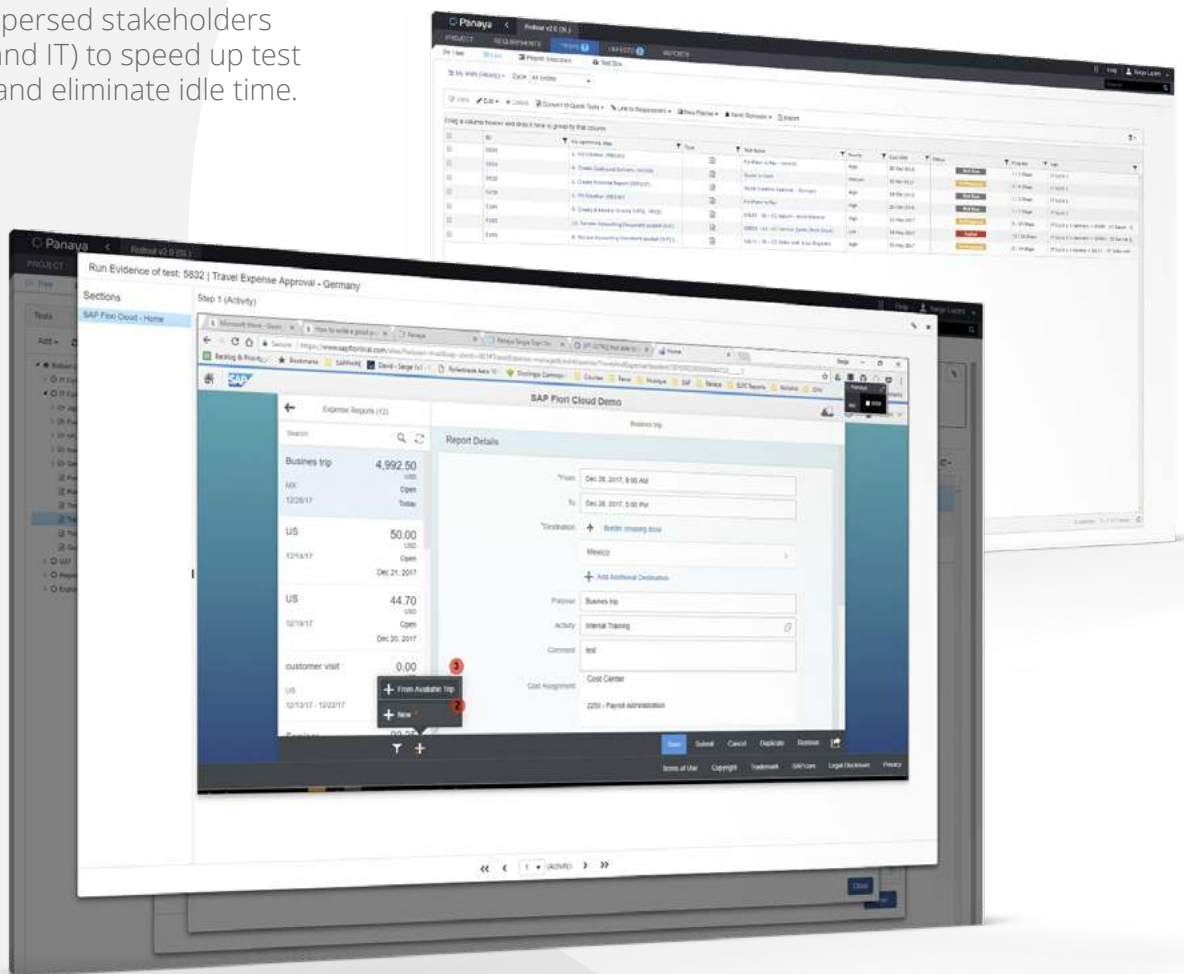

By automatically capturing screens and linking them to the test steps, we probably save 50% of our test time per test. As a result of the time savings, we've been able to work on projects that we wouldn't be able to otherwise."

Campbell Kay  
IT Manager, FFDB

# Collaborative Test Execution

Facilitate the collaboration between your cross-functional and globally dispersed stakeholders (business and IT) to speed up test execution and eliminate idle time.

## Test Evidence Automation

Save time by automatically capturing every test execution. Documentation can serve as audit-ready test evidence or as user guides. This will also reduce the back and forth between developers and testers in defect resolution.

**Compliance ready:** documentation is audit-ready, ensuring compliance with all internal and external quality standards.

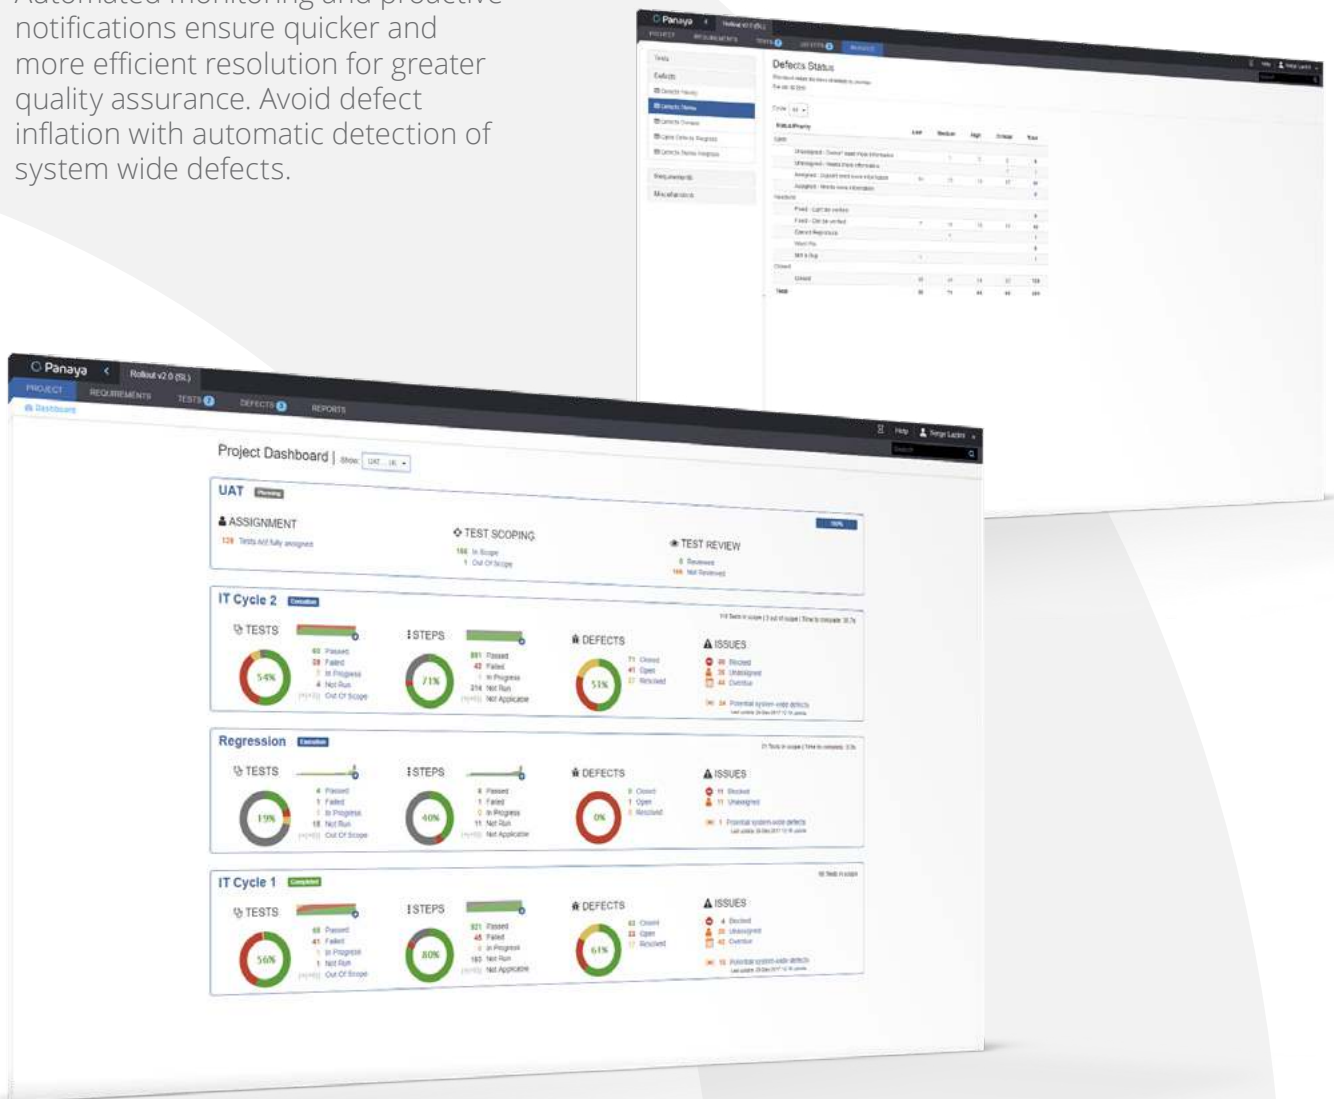

Panaya's system-wide defect tracking is so smooth, we use it to communicate with developers, testers, users and even external applications partners."

RJ Caswell  
Director, Business Applications

*Aritzia*

# Smart Defect Management

Automated monitoring and proactive notifications ensure quicker and more efficient resolution for greater quality assurance. Avoid defect inflation with automatic detection of system wide defects.

## Real-Time Test Monitoring

Full test visibility and tracking with intuitive dashboards and reports, reflecting the progress at the test and business process level.

"We would not have been able to do the testing that we did if we hadn't had the automation and the acceleration potential that Panaya brought to the table."

**Maximilian Mayrhofer**  
Global Program Manager

**Allianz**   
Global Investors

# Panaya Autonomous Testing<sup>SM</sup> for SAP

Enables zero-touch test case creation and maintenance eliminating the pains associated with business knowledge capture and the process of creating and maintaining manually engineered scripts. Omega, the machine learning engine behind Autonomous Testing<sup>SM</sup> automatically creates real-life test cases based on Business User activities captured in production.

## Traditional

## Zero Touch - Autonomous Testing

With Panaya Test Dynamix, accelerate and standardize packaged application testing without compromising on scope or quality. By encompassing the needs of all stakeholders and integrating standardized testing processes for both technical IT and Business users, Panaya reduces overall testing efforts by 30-50%.

**Experience Stress-Free Testing »**

Panaya, an Infosys company, enables organizations to accelerate application change and continuously deliver innovation with its Enterprise Agile Delivery Platform. Panaya provides cloud based application delivery, and test automation and management solutions that ensure collaboration between Business and IT. Enabling enterprise agility with faster release velocity and uncompromising quality, Panaya delivers an optimized user experience with end to end visibility of the application lifecycle. Since 2008, 1,600 companies in 62 countries, including a third of the Fortune 500, have been using Panaya to deliver quick quality change to enterprise applications.
