

Panaya Test Center

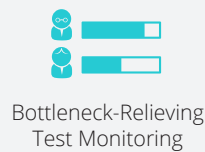

Next Generation Testing Solution

Managing change in today's testing environments, without compromising quality is a challenge all by itself. Complexity increases as more roles are now involved in the process and more unique variants exist to standard business flows. Investment in optimizing code-level testing automation is only one factor of business application testing.

Panaya's approach to testing tackles complexity and ensures business continuity while managing change, by aligning testing activities to mirror the actual business in production. This new approach marks a paradigm shift - from traditional code testing to **business process validation**.

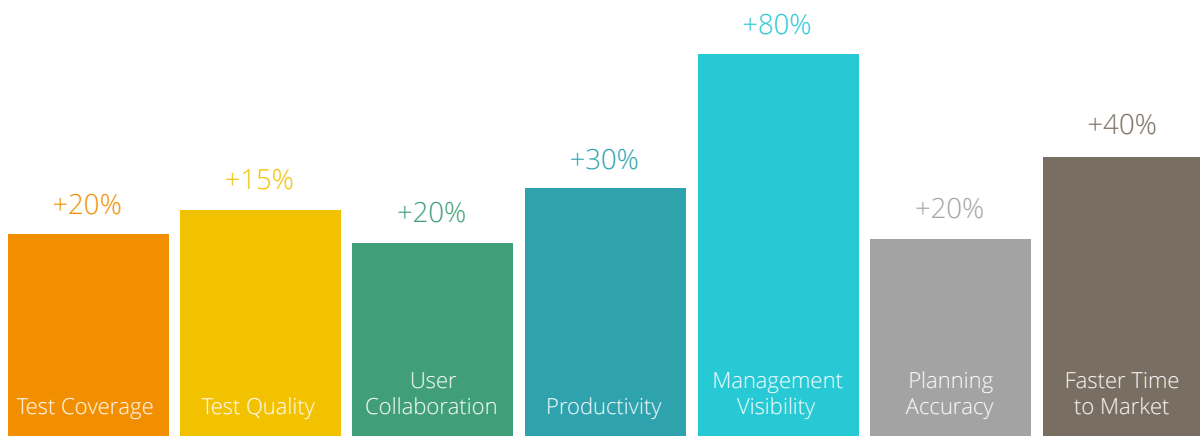

End-to-End Testing

Designed with a business process centric approach, Panaya Test Center is a test management solution for business-critical applications. Built around five principles: automation, collaboration, visibility, compliance and process, it does not only empower test managers. It also provides a comprehensive, yet simple way for functional experts and business users to run manual and automated testing - faster and more effectively.

Panaya Test Center Benefits:

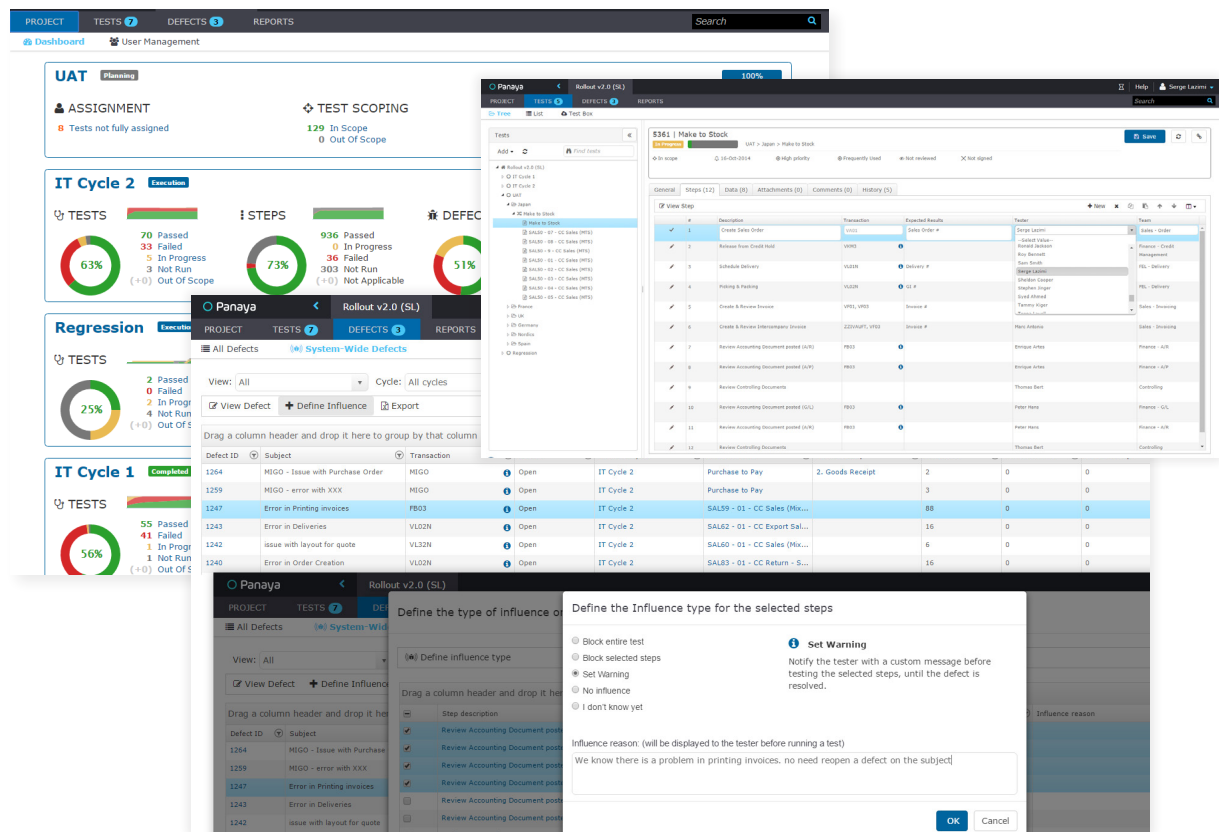

- ✓ 100% SaaS, no hardware, no software installation
- ✓ Intuitive dashboard for increased control and visibility
- ✓ Business process-centric defect management that increases productivity and reduces bottlenecks
- ✓ Automatic handover between testers, reducing idle time
- ✓ Automation for accelerated regression test cycles
- ✓ Automatic test run evidence for effortless and instant visibility into previous steps
- ✓ Automatic defect reporting, allowing developers to immediately attend to fixes
- ✓ Effortless documentation that offers reusable, detailed test scripts
- ✓ Automatic migration of your existing test scenarios for easy on-boarding

Panaya Test Center: Key Performance Indicators

Panaya Test Center Delivers 30% Reduction in Testing Effort

Panaya Test Center is cloud-based – no software or hardware installation and no technical implementation are required. You'll be up and running in approximately 48 hours.

Test Management

Panaya Test Center features test management capabilities that are business process-centric. They deliver real-time **visibility, control and collaboration** into all testing activities. For example, project managers and testing managers can easily assign different steps of a single business process to multiple functional experts or key users who can then run the tests in an automatic sequential workflow.

Effortless Migration

With Panaya Test Center there is no need to recreate or migrate your existing scripts and business processes. Whether they are in Word, Excel or PDF - just upload them to Panaya Test Box and Panaya handles the migration from start to finish.

Test Evidence

With no additional effort required by testers, Panaya Test Center automatically documents every test execution - delivering granular test evidence. This reduces the back and forth between developers and testers, providing a record of steps for test reproduction. Additionally, documentation is always audit-ready, ensuring you comply with all company quality standards.

Smart Defect Management

Panaya smart defect management provides a full suite of powerful features to increase productivity, encompassing industry best practices. Features include

- › Automatic alerts for defects
- › Real-time automatic documentation of defects
- › Retest notification to testers upon defect resolution
- › Close notification to developers upon retest success, for all impacted business-processes

Dashboards and Reporting

Panaya Test Center address the challenge of multiple users involved in testing each business process. It delivers real-time reporting and monitoring of project progress. Your visibility into end-to-end business processes testing includes standard reports that track tests and defects by cycle and business process.

User Acceptance Testing

Panaya Test Center is intuitive and easy to use, offering simple onboarding that speeds business user adoption. By removing the overhead involved in engaging casual testers, Panaya enables key users to focus on testing activities, raising productivity. Additionally, Panaya Test Center accelerates UAT cycles by eliminating bottlenecks with system-wide defect management.

Panaya, an Infosys company, enables organizations to accelerate application change and continuously deliver innovation with its Enterprise Agile Delivery Platform. Panaya provides cloud based application delivery, and test automation and management solutions that ensure collaboration between Business and IT. Enabling enterprise agility with faster release velocity and uncompromising quality, Panaya delivers an optimized user experience with end to end visibility of the application lifecycle. Since 2008, 1,600 companies in 62 countries, including a third of the Fortune 500, have been using Panaya to deliver quick quality change to enterprise applications. www.panaya.com
