

Case Study

aibel®

Aibel Standardized on Panaya CloudQuality™ Suite

Challenge

Trond Jansen, Aibel's ERP Manager, runs a 12 person team that is responsible for a worldwide corporation of 5,000 employees.

"Aibel has 2,500 SAP users and 50 key users. That's a lot for an ERP team of 12 to handle. It is very important for Aibel to stay current. We run most of SAP's major modules – Fico, PS, MM, Workflow and others. Our SAP is on EHP7 and we install 2 service pack stacks a year. Of course we have custom code, but we're close enough to standard that I'm very comfortable keeping Aibel at the cutting edge of what SAP has to offer.

The only thing more challenging than staying current on SAP is staying current with our testing!"

Before we started using Panaya, the ERP team had to manually distribute Word documents and Excel spreadsheets. Even worse, we had no way to collect and reuse our test scripts – so we were all wasting a lot of time."

Solution

Aibel began using Panaya CloudQuality™ Suite for all of their SAP testing. They moved from Word and Excel to Panaya's easy to use SaaS interface for keeping track of testing efforts.

Trond Jansen is thrilled. "Our entire SAP testing process is much more automated and better documented. Panaya's testing accelerators make testing much easier for key users – we give them personalized test scenarios and they don't need to reinvent the tests each time.

Panaya removes all transaction code that isn't affected, so we no longer need to run unnecessary tests. That is a big deal, because with all of the new code in any given SAP service pack, there is no way to fully test everything. Panaya allows us to avoid running unnecessary tests."

Panaya CloudQuality™ Suite

Benefits

Trond Jansen isn't looking back. "Panaya has significantly reduced the time that we reserve for testing. Aibel standardized on Panaya CloudQuality™ Suite and we look forward to continue saving 30% in testing time."

We are saving 30% in SAP testing time thanks to Panaya

The feature that our key users like the most is the ability to record and rerun test scenarios. They no longer have to waste time reinventing the same tests again and again.

Panaya CloudQuality™ Suite has significantly reduced the time that we reserve for testing and Aibel is incurring less internal costs

Trond Jansen, Aibel

About Aibel | Aibel is a leading service company in the oil and gas industry. The company is also established within renewable energy. Around 5,000 employees are engaged in work both onshore and offshore. Aibel maintains a presence in 11 locations around the world, focusing on Europe and Asia.

With Panaya, organizations can accelerate application change and continuous delivery of innovation. Panaya provides cloud based test management, test automation and application lifecycle management solutions that ensure collaboration between Business and IT. Enabling faster release velocity while ensuring quality, Panaya delivers an optimized user experience with end-to-end visibility of the application lifecycle. Since 2008, 1,600 companies in 62 countries, including a third of the Fortune 500, have been using Panaya to deliver quick, quality change to enterprise applications. www.panaya.com
