

Case Study

Panaya

Trombini Brazil standardized on Panaya CloudQuality™ Suite for Oracle EBS R12 upgrade, patches and testing

Challenge

Anibal Tebet is Trombini Brazil's IT Manager. He manages a team of ERP professionals that is responsible for Trombini Brazil's Oracle EBS system. Trombini has more than 2,000 employees in Brazil and the IT/ERP team never has a moment to rest.

"In addition to our 2,000 employees, we have many key users. As you can imagine, they're busy and it is always a challenge to align them with our ERP needs. No Oracle EBS R12 change is risk free; I needed to be able to mitigate the risk and time for the R12 Upgrade to make sure that we could go live on time with no critical failures in production.

Panaya CloudQuality™ Suite provided a high ROI for our Oracle EBS R12 upgrade."

IT Manager

Solution

Trombini Brazil used Panaya CloudQuality™ Suite for their Oracle EBS R12 upgrade. Given the Trombini business dynamism and a 24x7 operation, Panaya had the challenge to migrate the environment on time with no critical failures and an absolute minimum disruption on Trombini's production operation.

Trombini leveraged Panaya's SaaS solution to identify changes in existing extensions. The Panaya CloudQuality™ Suite suggested the best ways to adapt Trombini's code in order to accelerate the conversion process and testing. In addition, the Panaya CloudQuality™ Suite dashboard enabled managers to control and monitor the progress of work during all the project.

"Panaya provided an important solution for Trombini, offering assertive and reliable tools with a high return on investment," said Anibal Tebet.

Gaby Koren, VP Sales Americas at Panaya, is thrilled to be working with Trombini Brazil. "We are introducing an innovative way of managing cost and time to market savings to the Brazilian market."

Panaya CloudQuality™ Suite Benefits

Trombini Brazil completed their Oracle EBS with zero disruptions to the business.

Panaya enabled Trombini Brazil to accelerate their Oracle EBS R12 upgrade. Trombini Brazil experienced a smooth R12 upgrade with zero disruption to the business. Panaya CloudQuality™ Suite dashboards allowed managers to control and monitor upgrade throughout the project.

Panaya provided an important solution for Trombini, offering assertive and reliable tools with a high return on investment."

About Trombini | Trombini started as a commercial company in 1941, by Mirtillo Trombini (later establishing a partnership with his family members) and it was transformed into an industrial group in 1971. It has constantly been modernized in order to be more and more competitive and competent in the fulfillment of the market demands. Trombini is the second biggest manufacturer of multi-wall paper bags in Brazil and the fourth of Corrugated Cardboard Packaging, in addition to being one of the largest recyclers of paper for packaging in the country. And there is more, it develops wide pine and eucalypt forests, planned to be collected and replanted, complementing its sustainability and integration. With its modern management, Trombini stands out in the Brazilian scenario as a sustainable company, technologically advanced and a partner to its customers, with an unparalleled service standard.

With Panaya, organizations can accelerate application change and continuous delivery of innovation. Panaya provides cloud based test management, test automation and application lifecycle management solutions that ensure collaboration between Business and IT. Enabling faster release velocity while ensuring quality, Panaya delivers an optimized user experience with end-to-end visibility of the application lifecycle. Since 2008, 1,600 companies in 62 countries, including a third of the Fortune 500, have been using Panaya to deliver quick, quality change to enterprise applications.
