

Release Dynamix

Next Generation ERP Impact Analysis,
Now for Any Change

From maintenance to new functionality to customization, change is relentless. Designed to deliver benefits, change projects also introduce cost and complexity, take time to implement, and pose a risk to the enterprise. But it's possible to seize control over enterprise application change - enhancing quality while saving time and reducing risk.

Reduce the Time, Cost and Risk of ERP Changes by 30-50%

Panaya Release Dynamix [RDx] is the enterprise approach to be more agile in addressing constant ERP application change. Offering a uniquely simple solution for SAP and Oracle customers, RDx combines change impact, code remediation and collaborative testing tools for IT and business to reduce time, effort and risk by 30-50%.

With real-time insights into change risk and quality, and automatic corrective actions, you can quickly and safely release business application changes into production.

Deliver Business Value Faster

Manage changing priorities and keep your ERP relevant in shorter release cycles.

See Everything

Gain visibility into your change implementation with real-time monitoring and reporting.

Sync Everyone

Bring together business, testing, development and delivery teams on a collaborative platform.

Be Proactive

Know what will break at the start with real-time impact analysis.

Ease of Use

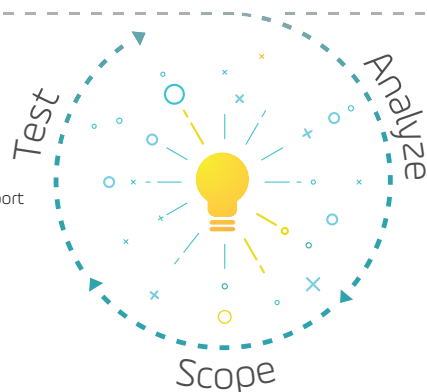

SaaS solution is intuitive for quick onboarding for both business and tech users.

Accelerate Change

Plan

- › Requirements management
- › Implement to development

- › Manage
- › Accelerate
- › Document & report

- › Know what to test
- › Prioritize remediation
- › Know what to fix

Risk-Free Go-Live

- › Continual change delivery

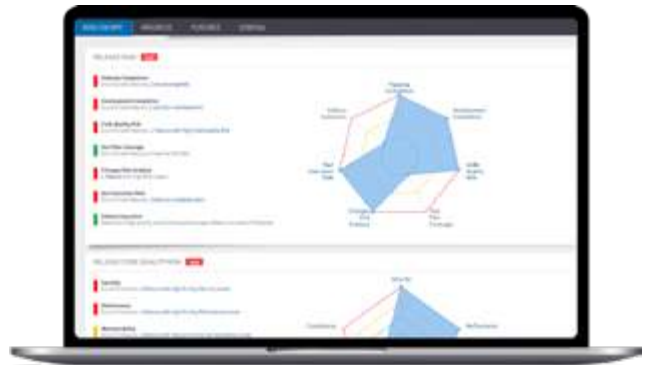

- › Pinpoint the impact
- › Analyze the risk, code quality and conflict

Collaboration & Visibility

Gain Visibility and Reduce Risk

Detailed Risk Cockpit

Visualize the scope of upcoming releases, and overall risk to ERP change implementation, based on dev, test, governance and risk.

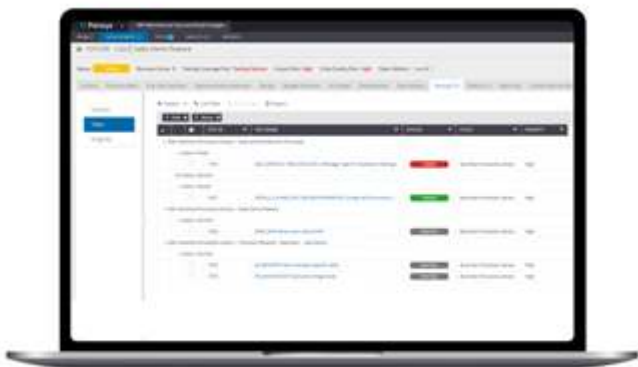

Analyze

Mitigate Risk with Real-Time Impact Analysis

Change Impact Analysis

Immediately gain visibility into impacted objects and their respective productions usage, Test Coverage Score and Automatic Code Quality defects identification and their correction tasks.

Business Process Risk Analysis

Map any impacted entry point within your business process library to understand the downstream impact on any business process while optimizing your regression cycle.

Code Quality Analysis

Automatically combine coding and quality assurance into a single activity to eliminate code instability with predefined ABAP standards for security, performance, maintainability, robustness and compliance.

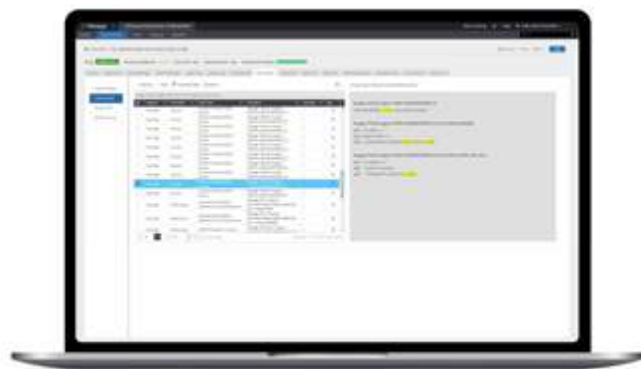

Scope

What to Test, What to Fix

Test Coverage

Risk-based testing plans that define the right coverage required to address the risk.

Code Fix

Impacted codes are mapped and highlighted so you can quickly implement the relevant code components to fix the affected areas.

Test

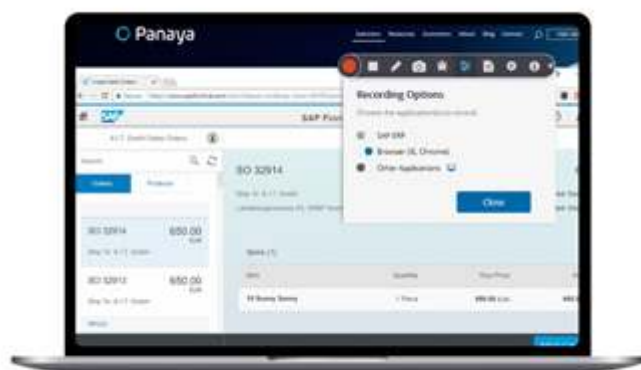

Manage and Accelerate Test Execution

Smart defect management for quick and efficient release cycles, reduced duplication of defects and more efficient project timelines.

Automatically generate test plans based on impacted transaction that define the optimal coverage capable of addressing all risk using existing test libraries.

Record & Play enables the capturing of tests in a single click which can be reused for codeless automation.

Integrate with the Tools You Love

Over 150 Integrations to Best in Class Solutions

Panaya RDx is a SaaS solution which integrates with the tools you are already using for software development and delivery so you have better visibility, collaboration and reporting.

Real-time Risk Analysis | Automatic Code Quality Analysis | Risk-Based Testing
