Panaya Release Dynamix

Next Generation Impact Analysis

Now for Oracle® EBS Customizations, Patches and Upgrades

From maintenance to new functionality, to new customizations, change is relentless. Designed to deliver benefits, change projects also introduce cost and complexity, take time to implement and pose a risk to the enterprise. But it’s possible to seize control over Oracle EBS change – enhancing application quality while saving time and reducing risk.

Reduce the Time, Cost and Risk of Oracle EBS Changes by 30-50%

Panaya Release Dynamix [RDx] is the enterprise approach to be more agile in addressing constant change in your EBS. Combining next generation impact analysis, risk-based testing and automated test management tools, Oracle EBS customizations, bug fixes, new functionality activation, patches and upgrades can be released faster and more efficiently.

Release Dynamix for Oracle offers a change automation solution that pinpoints the impact and analyzes the risk of any change so that you can effectively scope your testing. And with a feature rich test management platform, you can also better manage, accelerate, document and report all testing activities, reducing the time of Oracle EBS changes by 50%.

Accelerate Change

Deliver Business Value Faster
Manage changing priorities and keep your SAP relevant in shorter release cycles.

See Everything
Gain visibility into your change implementation with real-time monitoring and reporting.

Sync Everyone
Bring together business, testing, development and delivery teams on a collaborative platform.

Be Proactive
Know what will break at the start with real-time impact analysis.

Ease of Use
SaaS solution is intuitive for quick onboarding for both business and tech users.
Business Process Risk Analysis
Map any impacted entry point within your business process library to understand the downstream impact on any business process while optimizing your regression cycle.

Change Impact Analysis
Immediately gain visibility to impacted objects and their respective productions usage, Test Coverage Score.

Requirements Conflict Analysis
Identify when different requirement code changes impact a specific object within the project and release so that you can resolve integration conflict early in the process.

Scope
What to Test

Risk Based Testing
Test plans that define the right coverage required to address the risk both on the module and object level.

Automatic Test Suggestions
Reuse your current test case assets for maximum coverage for the impacted entry points.
Test
Manage and Accelerate Test Execution

Record & Play
Enables the capturing of objects in a single click which can be reused for codeless automation

Smart Defect Management
For quick and efficient release cycles, reduced duplication of defects and more efficient project timelines

Test Cycles Dashboard
Real time visibility into test cycle execution with detailed reports on status, defects and completion

Visibility & Collaboration

Visibility
Visualize the scope of upcoming releases, and overall risk to ERP change implementation, based on dev, test, governance and risk

Collaboration
One platform for all stakeholders to view and collaborate from requirements, test plans, defect status through completion
Integrate with the Tools You Love
Panaya integrates with the tools you are already using for better visibility, collaboration and reporting.
