

## The Safest Way for Businesses to Change

Panaya is the leader in ERP and CRM change intelligence. Our SaaS solutions reduce the time, cost, and risk involved in the delivery of change to business applications like [SAP®](#), [Oracle® EBS](#), and [Salesforce.com](#). Powered by leading-edge data aggregation and machine learning algorithms, Panaya delivers deep insights that help organizations determine dependencies, accelerate testing, and ensure business continuity.

Be it an SAP S/4HANA conversion or ECC enhancements, Oracle EBS upgrades and patches, or just adding new functionality and customizations, application change is relentless. Designed to deliver benefits, these projects introduce cost, risk, and complexity.

Panaya shows you the full impact of application changes, **removing risk, and reducing cost and complexity**. With Panaya, your organization can have the peace of mind it needs to freely and rapidly evolve.

## The Change Intelligence Platform

**SAP & Oracle** | Any change to your SAP ERP or Oracle EBS system will have a downstream impact on multiple business processes. Using machine learning algorithms and advanced automation, [Panaya Release Dynamix \(RDx\)](#) shows you exactly what will break, what you need to fix and how to test this, so your business can move forward without having to take any steps backward.

**Enterprise Testing** | Panaya introduces a business process testing approach to application life cycle management with [Panaya Test Dynamix](#), a cloud-based Testing Intelligence platform. From initial business change requests through to testing and defect management, Panaya eliminates risk, so that change becomes a natural part of your business.

**Salesforce** | The more complex your SFDC environment, the more difficult it becomes to foresee the impact of planned customizations and changes. [Panaya ForeSight](#) provides a 360-degree view of the impact of component changes, their inter-dependencies, and recommended steps.

## Customers

[Panaya's customer base](#) spans over 3,000 enterprises worldwide, including a third of the Fortune 500. These include more than 300 [Panaya Test Dynamix](#) customers and over 50 ALM replacements. Panaya customers operate in various markets including Utilities, Oil & Gas, Automotive, Manufacturing, Pharmaceuticals, Infrastructure, and Services.
