

Panaya Release Dynamix

FOR ORACLE EBS UPGRADES

...

THE KEY TO A SUCCESSFUL MOVE TO 12.2

Oracle is pulling the support plug on EBS R12.1!

Upgrading to R12.2 requires many architectural and code changes.

The proactive identification of online patching (OLP) incompatibilities is critical to your success of your upgrade since many of these issues cannot be detected by pre-release testing, leading to unexpected complications in your production environment post go-live.

...

BENEFITS

Know all the unknowns

See exactly what to fix and how long it will take to resolve before you start

Go live faster

Cut project time by 50% with automatic scoping and built-in collaboration

Change based on your data, not estimations

Optimize correction & testing scope, based on your actual system usage

Start immediately

Accelerate your upgrade with a ready-to-execute project plan generated in just 48 hours

**ENSURE SIMPLE
AND RISK-FREE
UPGRADES TO
EBS 12.2**

ORACLE'S READINESS SCRIPTS ARE FREE, BUT INSUFFICIENT

False Alarms

80% of results are false alarms or not actionable

...

Partial Coverage of Risk

Only 70% of your true upgrade risk is identified (based on customer data)

...

Mostly Unactionable

Results are not user-friendly and do not provide actionable insights into the issues detected

...

KEY FEATURES

Full Project Plan including all tests and corrections

Don't settle for best-practice generic plans. Panaya generates a tailor-made, ready-to-execute, conversion project in less than 48 hours. Optimize your scope with Risk-Based Testing analytics based on your own code and usage.

Collaborative Fix & Test management workflows

Review annotations on impacted code snippets, suggested fixes, and tests to validate. Panaya tells your team exactly what to fix, streamlining your project and eliminating go-live errors.

Real-time customized dashboards

Gain real-time visibility into your progress and remove bottlenecks with your own customizable KPI dashboard, fully actionable to control each step of your project.
