

PANAYA RELEASE DYNAMIX

**Deliver Innovation and Business
Value Faster and without the Risk**

From maintenance to new functionality to customization, change is relentless. Designed to deliver benefits, change projects also introduce cost and complexity, take time to implement, and pose a risk to the enterprise.

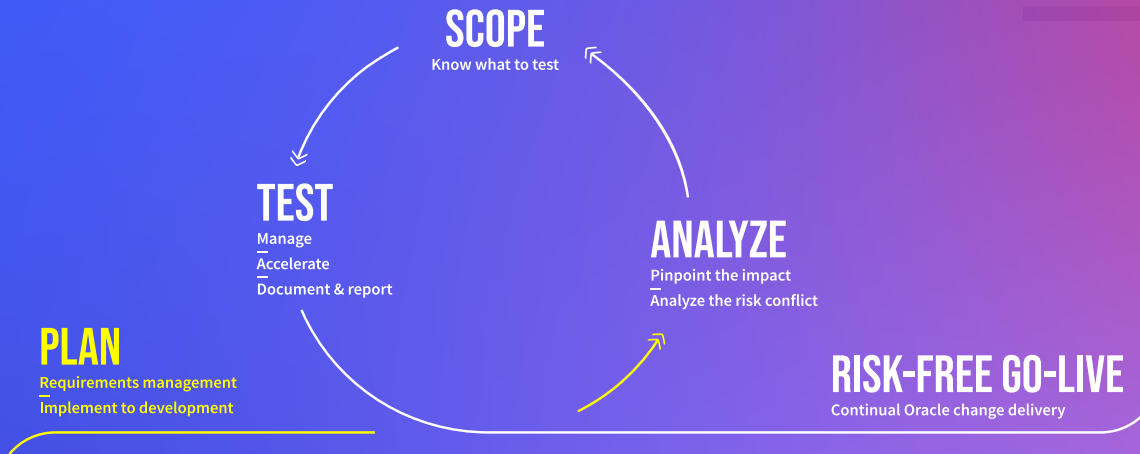

But it's possible to seize control over enterprise application change while saving time and reducing risk.

ORACLE PARTNER

 **Panaya**

REDUCE TIME, COST AND RISK OF ORACLE ERP CHANGES BY 50%

Panaya Release Dynamix is the enterprise approach to be more agile in addressing constant ERP application changes. Offering a uniquely simple solution for Oracle customers, Release Dynamix combines change impact, patch analysis and collaborative testing tools for IT and business to reduce time, effort and risk.

With real-time insights into change risk, you can quickly and safely release business application changes into production.

See Everything

Gain visibility into your change implementation with real-time monitoring and reporting.

Sync Everyone

Bring together business, testing, development and delivery teams on a collaborative platform.

Business Acceleration

Manage changing priorities and keep Oracle ERP relevant in shorter release cycles.

Ease of Use

Our SaaS solution is intuitive for quick onboarding for both business and tech users.

Be Proactive

Know what will break at the start with real-time impact analysis.

COLLABORATION & VISIBILITY

GAIN VISIBILITY AND REDUCE RISK

Detailed Risk Cockpit

Visualize the risk of upcoming releases and pending transport deployments, based on Dev, Test, and Governance risk factors.

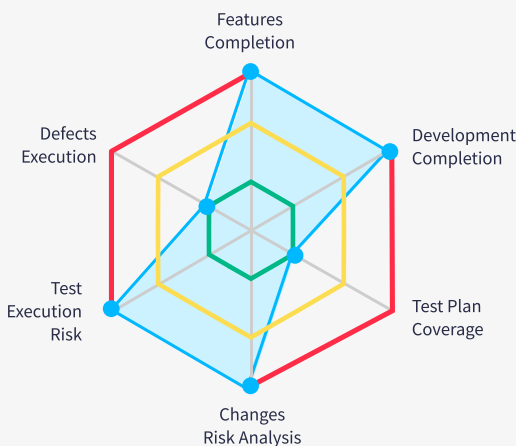

RISK MITIGATION

- 0 Features with High Priority and high Impact Risk
- 528 Conflicts between Features in this project
- 0 Features with higher actual testing efforts than estimated
- 2 Tests not mapped to features
- 0 Features with actual implementation efforts higher than estimated
- 0 Features with High Priority and open Defects

PROJECT RISK

HIGH

- Features Completion**
Out of 2 total features, 2 are uncompleted
- Development Completion**
Out of 2 total features, 2 are still in development
- Test Plan Coverage**
Out of 2 total features, 0 have no Test plan
- Changes Risk Analysis**
2 Features with High Risk impact
- Test Execution Risk**
Out of 2 total features, 2 have no completed tests
- Defects Execution**
There are 0 High priority and 0 Critical priority open defects

ANALYZE

MITIGATE RISK WITH REAL-TIME IMPACT ANALYSIS OF ORACLE EBS PATCHES AND ONGOING DEVELOPMENT

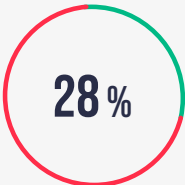

Change Impact Analysis

Immediately gain visibility into impacted objects, their respective usage in production, and related test coverage.

IMPACT
RISK
HIGH

Scoped in Test Coverage

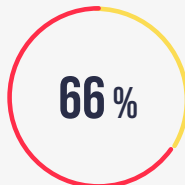

28% Entry points are covered by tests

377 Not Covered 151 Covered

Scoped Out Risk

66% Scoped out entry points are in risk

33 Frequently Used 0 Rarely Used 0 Unknown
17 Normally Used 0 Unused

Business Process Risk Analysis

Map any impacted entry point within your business process library to understand the downstream impact on any business process while optimizing your regression cycle.

TEST ID	TEST NAME	STATUS	CYCLE	USAGE	PRIORITY	IN SCOPE
16358	Procurement Contract	Failed	ECC UAT	Frequently	High	YES
16340	Sales of Nonstock Item with Ord...	In Progress	ECC UAT	Frequently	High	YES
16354	Stock Handling Scrap and...	In Progress	ECC UAT	Frequently	High	YES
16372	Procurement and Consumption of Consigned Inventory	In Progress	ECC UAT	Frequently	High	YES
16349	Return to Vendor	Passed	ECC UAT	Frequently	High	YES

SCOPE

WHAT TO TEST

Test Coverage

Risk-based test plans that specify the optimal coverage to validate risk. Instantly identify any gaps in your test coverage.

Change Coverage

Covering Tests

Tests not related to the change impact (20)

Tests covering the change impact (11)

Automatically Generate Test Plans

Generate new test assets with a button click, ensuring complete test coverage and improving your test library.

	ENTRY POINT	DESCRIPTION	COVERED	TYPE	USAGE
<input checked="" type="checkbox"/>	POXRQACC	Requisitions by Account	No	Report	Normally Used
<input checked="" type="checkbox"/>	POXPOEPO	Purchase Orders	No	Form	Frequently Used
<input type="checkbox"/>	POXPOVPO	Display of Changes for Customer	Yes	Report	Normally Used
<input checked="" type="checkbox"/>	APXINWKB	Invoice Workbench	No	Form	Rarely Used
<input type="checkbox"/>	PORQACCGEN	PO Req Account Generator	Yes	Workflow	Frequently Used
<input type="checkbox"/>	GLXJIINT	Journal Import	Yes	Concurrent Program	Normally Used

Automatically generate tests to cover the selected Entry Points

Generate Test

TEST

MANAGE AND ACCELERATE TEST EXECUTION FOR BOTH E-BUSINESS SUITE AND ERP CLOUD

Smart Defect Management

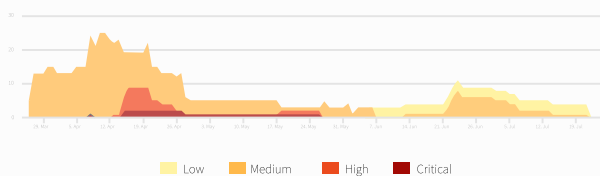

Link defects to related tests, reducing duplication of efforts and increasing testing efficiencies.

OPEN DEFECTS PROGRESS

This report gives a view of the number of open and resolved defects by priority

Cycle: All

Release: All

Real-time, Actionable Insights

Full visibility across the defects lifecycle with custom dashboards and reports

STEP 2 - CREATE SALES ORDER (OEXOEORD)

SYSTEM-WIDE DEFECT ALERT

A defect is currently opened on transaction VA01 (master data problem): [Defect 2652](#)

Do not run this step until you receive an automatic notification of resolution.

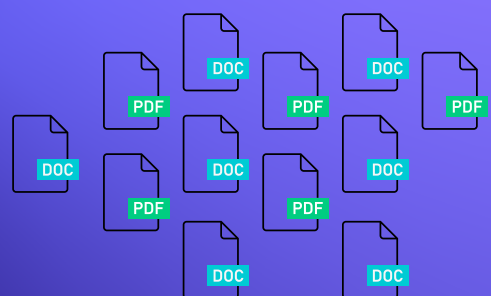

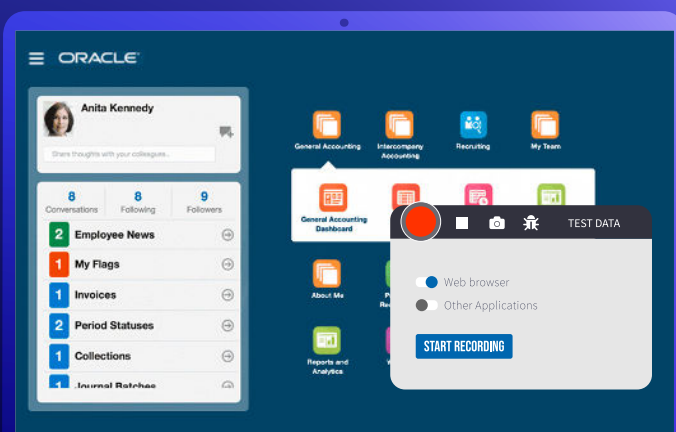

OK

System-Wide Defects

Unique feature anticipates how a defect could affect future tests, preventing defects inflation and duplication”

Record & Play

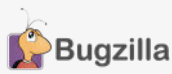

Enables the effortless generation of test evidence, which can be reused for codeless automation and automatic documentation.

Audit-ready and automated documentation for quality standards, with considerable time savings. End-to-end automated testing based on recording scripts.

INTEGRATE WITH THE TOOLS YOU LOVE

OVER 150 INTEGRATIONS TO BEST IN CLASS SOLUTIONS

Panaya Release Dynamix is a SaaS solution which integrates with the tools you are already using for software development and delivery so you have better visibility, collaboration and reporting.
