

SAP Automatic Code Corrections for System Integrators

Break Through Custom Code Bottlenecks
and Get Test-Ready

The Challenge

The imminent end of SAP ECC support is accelerating the demand for S/4HANA migration and making ABAP developers even scarcer. This additional delivery constraint on teams that are already stretched thin is forcing system integrators to choose between delaying projects and overextending resources. To make matters worse, custom code remediation, which accounts for nearly 40% of every migration, still relies on manual fixes. This wastes your experts' talents, slows timelines, and limits the number of projects you can run in parallel.

Cover 100% of Custom Code Issues

Panaya combines 20 years of SAP expertise with enterprise-grade GenAI that's been trained on millions of real-world code lines from hundreds of Fortune 1,000 systems.

With Panaya Automatic Code Corrections (ACC), system integrators can quickly transform custom code into a scalable, low-touch workflow. First, ACC analyzes your SAP system and delivers a prioritized, execution-ready plan within 48 hours. Then users automatically apply SAP-aligned fixes and remove unused code to reduce technical debt. The most complex cases are addressed

with AI-generated suggestions, ensuring 100% coverage of your custom code.

Finally, every code fix is fully validated through linked functional tests that cover all impacted business processes. ACC learns from every project. Fixes are captured, reused, and applied across clients.

By automating remediation, built-in testing, and consolidating delivery knowledge, **system integrators accelerate timelines, scale more efficiently, and deliver more S/4HANA projects without increasing headcount.**

inetum.

Panaya gives us a structured approach and real-time visibility across the entire migration. We track progress, control every task, and assign ownership, turning a complex process into a manageable and efficient operation.

In some projects, code corrections made up 50% of the effort, and we handled them automatically instead of fixing them manually."

Juan Carlos Herranz
IT Manager

Benefits

Increase Efficiency and Grow Revenue

Increase delivery volume with the same headcount, serve more clients, boost margins, and drive new revenue streams.

Focus Expertise Where it Counts

Don't waste your experts' premium skills by having them churn through low-value work. Release your scarce ABAP and SAP experts from repetitive remediation tasks.

More Projects in Parallel

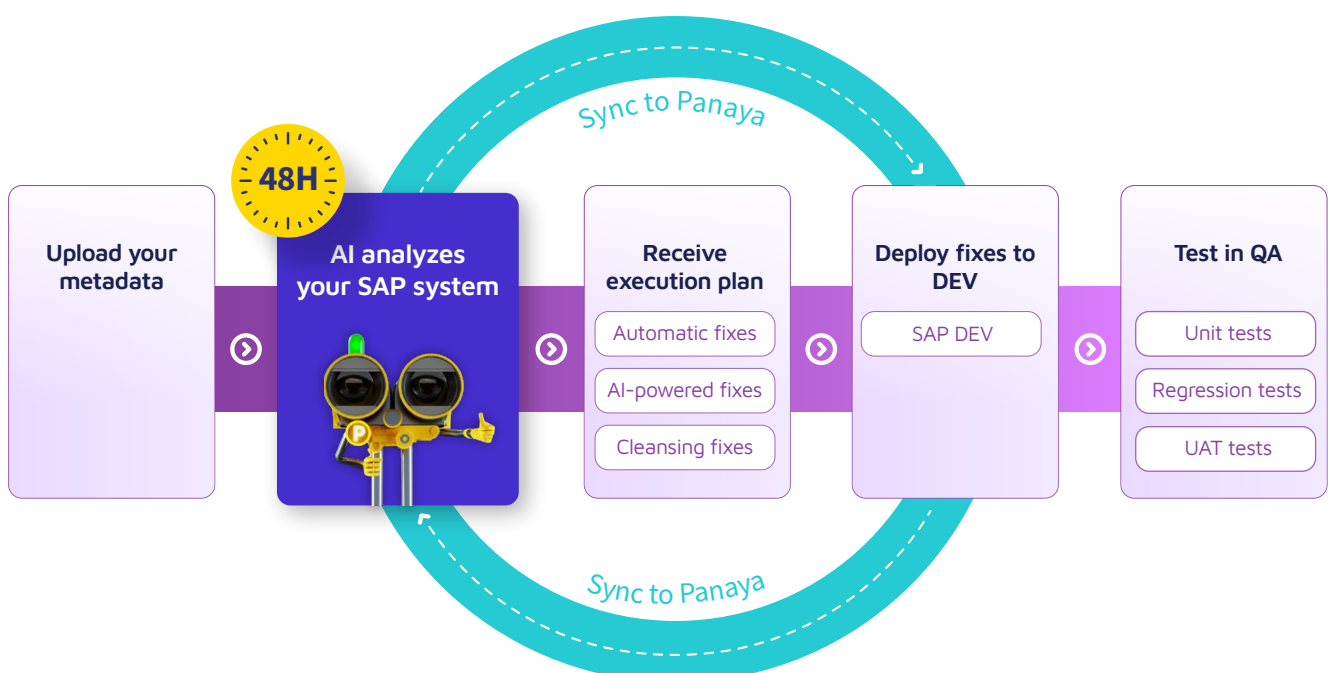

Cover 100% of your code issues with automation and AI. Fix what's broken, remove what's not needed, and skip what already works. Eliminate delays, reduce manual effort, and keep your migration on track.

Avoid Errors and Endless Fixing Cycles

Replace manual work with AI-driven, SAP-aligned automation to ensure consistent quality, zero rework, and higher client satisfaction.

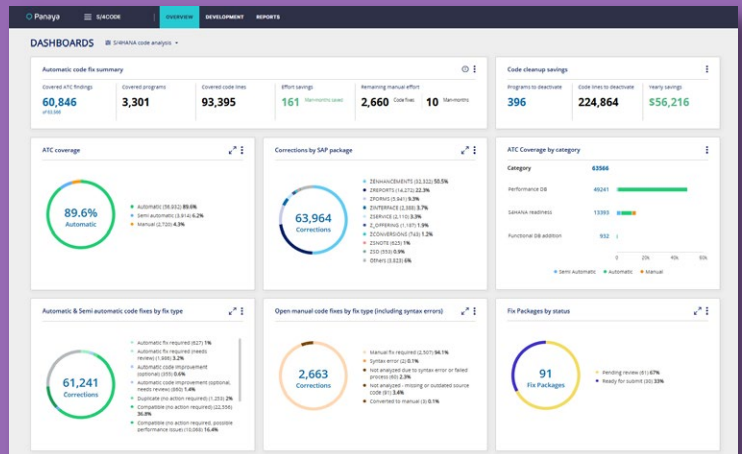

Optimize Migration with Maximum Automation

Key Features

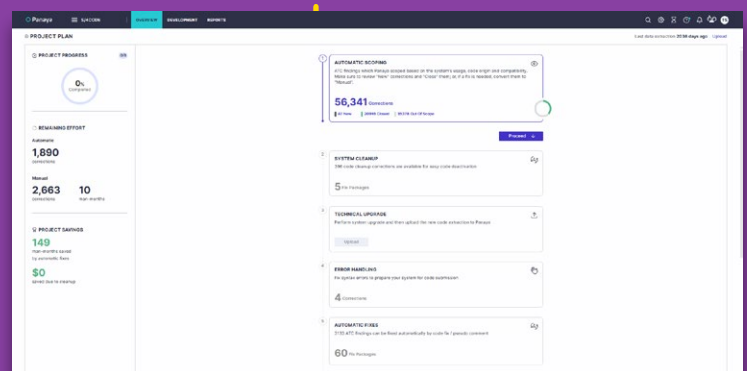

Execution-Ready Plan in 48 Hours

Gain instant clarity with a prioritized correction plan that identifies risks, scopes effort, and maps your fastest path forward.

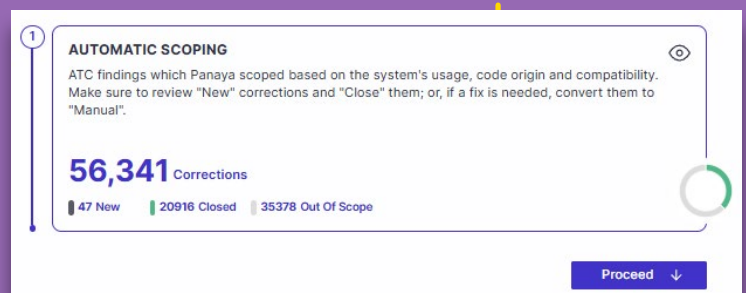

Field-Tested Project Methodology

Proven approach built on 20 years of SAP experience and thousands of successful projects, designed to drive clarity, speed, and reliable results.

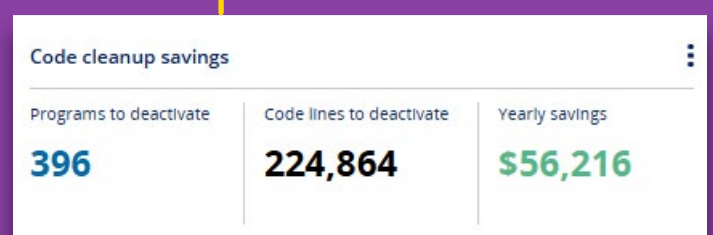

Scope Reduction via Compatibility Analysis

Detect compatible code early to cut effort, cost, and correction scope.

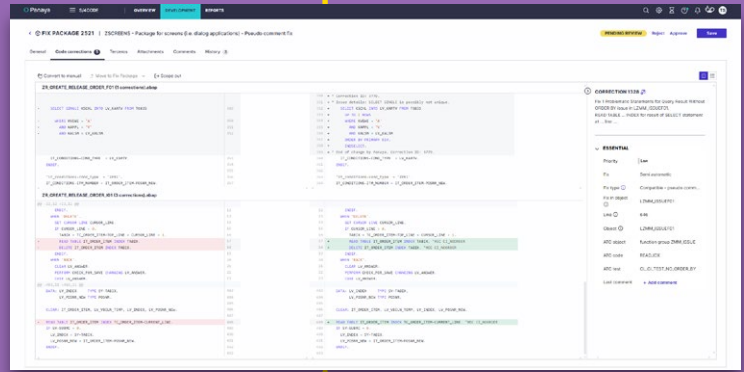

Automatic Code Cleansing

Eliminate outdated, unused code to reduce the total cost of ownership (TCO) and technical debt.

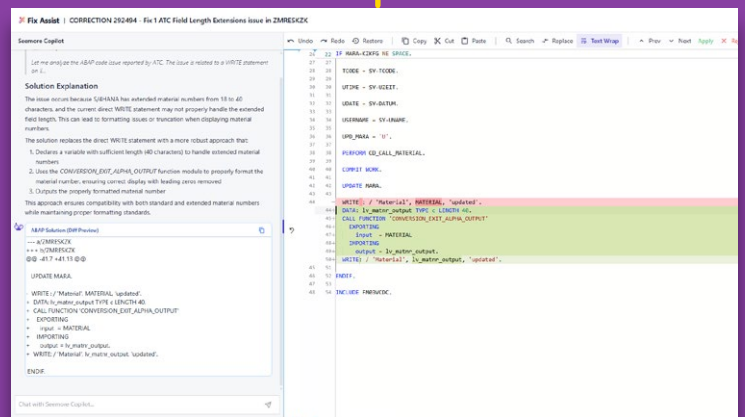

Automatic Code Fixing

Apply and deploy SAP-aligned fixes at scale to cut timelines and reduce manual work.

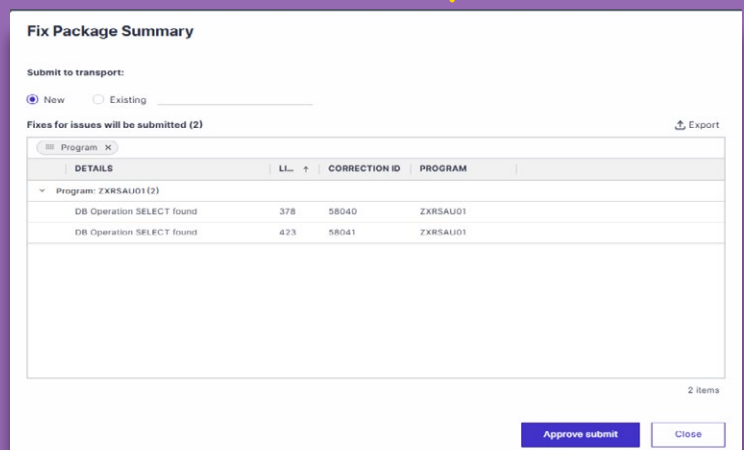

AI-Powered Code Corrections

Replace manual fixes with Seemore, Panaya's AI assistant, for safe, context-aware corrections on complex issues. Drawing on SAP best practices, community insights, and Panaya's knowledge base, it delivers fast and accurate fixes.

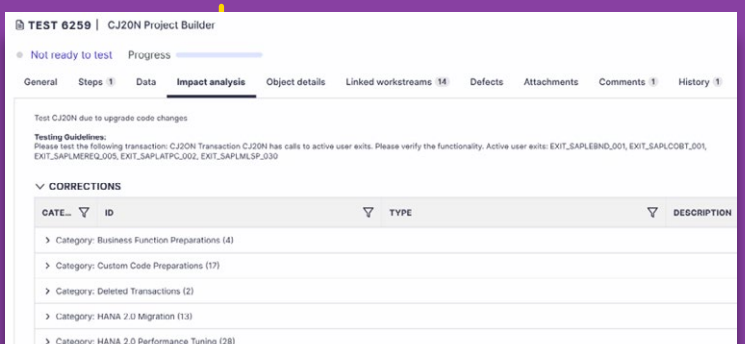

Direct Transport Submission

Safely deploy fixes straight into your SAP transport. Panaya integrates effortlessly with your existing workflow for smooth, error-free delivery.

Fix-to-Test

Automatically create and link tests to every code correction to validate each fix and ensure business processes continue without disruption.

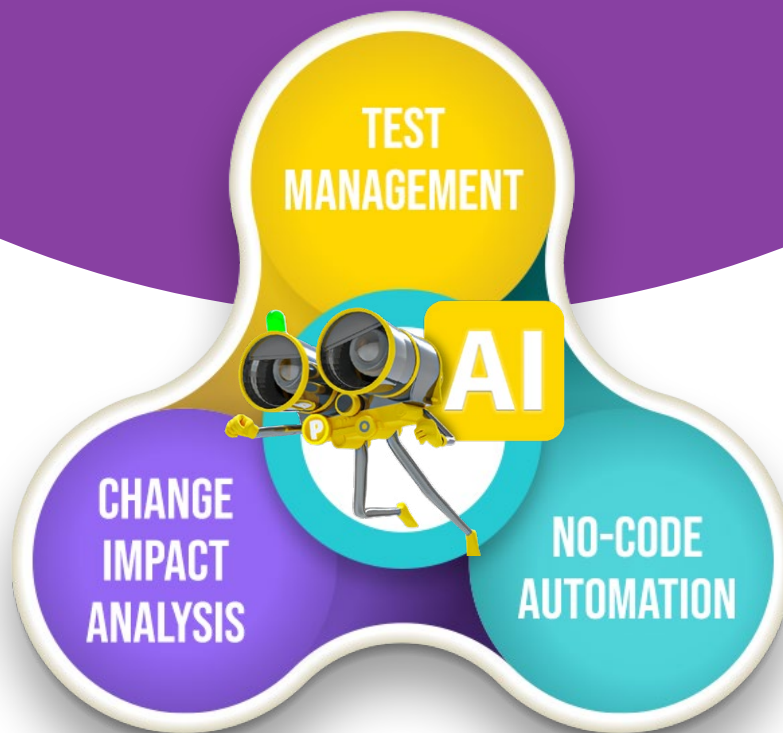

1 Native Platform

Combining Impact Analysis,
Test Management & Automation

to ensure seamless operations with minimized risk across your
Enterprise Business applications.

About Panaya

Panaya, a SaaS-based company certified by SAP, Oracle, and Salesforce.com, offers an all-in-one platform for Smart Testing solutions and Change Intelligence tailored for ERP, CRM, and cloud business applications. Panaya accelerates and de-risks digital landscapes with AI-powered Test Automation, Test Management, and Impact Analysis. Panaya's focus on ease of use and an intuitive interface ensures seamless collaboration between business and IT, empowering business users and IT professionals to gain real-time visibility and control over their projects. This capability enables faster releases and continuous delivery of high-quality software. Since its founding in 2006, over 3,000 companies across 62 countries, including a third of the Fortune 500, have trusted Panaya to drive rapid, quality testing and change management in their enterprise business applications.
